RESEARCH EXPERIENCE

DGP Lab, University of Toronto

July 2024 - November 2025

Research Intern, Host: David Lindell, Andrea Tagliasacchi

- Developed novel 3D representation based on Neural ODEs to reconstruct plant growth from timelapse videos. Built custom imaging system to capture multi-view data of plant growth. Currently in submission.
Topics: 4D Gaussians, dynamic scene reconstruction, neural fields, HexPlane

DGP Lab, University of Toronto

August 2023 - July 2024

Research Intern, Host: David Lindell

[Project Link](#)

- Optimized lidar-based neural field for surface reconstruction, achieving high-fidelity surface reconstruction and robustness in low-light conditions
Topics: surface reconstruction, neural fields, Neuralangelo, InstantNGP

PUBLICATIONS

Peer-Reviewed

- [2] **Weihan Luo**, Anagh Malik, David B. Lindell, "Transientangelo: Few-Viewpoint Surface Reconstruction Using Single-Photon Lidar", WACV 2025.
- [1] Samir Khaki and **Weihan Luo**, "CFDP: Common Frequency Domain Pruning", CVPR workshop 2023.

WORK EXPERIENCE

Royal Bank of Canada

May 2022 - September 2023

Data analyst/scientist

Technologies used: Python, LightGBM

- Developed a benchmark for future data analysis on a newly acquired Ontario housing valuation dataset.
- Conducted experiments on training on LightGBM with Optuna tuning to predict Canadian housing prices.
- Surpassed the baseline model by achieving a 2% increase in precision and 1% decrease in MAPE.

EDUCATION

University of Toronto

2019 - June 2024

Honours Bachelor of Science in Mathematics, Statistics, and Computer Science

PROJECTS

Forecasting Chess Elo On A Time Series

December 2021

Data Science Project

[Project Link](#)

- Devised a custom model to predict chess ratings based on past games.
